

Acronis Security Awareness Training

Engaging security awareness training and phishing simulations, designed for MSPs

Acronis Advanced Security Awareness Training (SAT) is a managed security awareness training service that helps MSPs improve their clients' security posture and assists them in realizing higher training completion rates, as well as complying with cyber insurance mandates, industry-specific regulations and other third-party security training requirements.

Facilitate compliance

Enable clients, including those in regulated industries, to comply with SOC 2, PCI DSS, GDPR, HIPAA and more.

Help clients meet cyber insurance requirements

Assist clients in meeting cyber insurance requirements that include completing SAT. Failure to comply with these terms can lead to denied claims or reduced coverage.

Improve clients' security posture

Encourages a proactive approach to security across the organization. Extend the collection of indicators of compromise (IoCs) to employees.

MORE THAN YOUR AVERAGE BACKUP — A COMPLETE CYBER PROTECTION SOLUTION

Boost revenue and growth

Generate high-margin, repeatable revenue with no up-front cost. Effortlessly add another stream of revenue.

Deliver complete Microsoft 365 protection

Centrally manage SAT, email archiving, backup, email security and collaboration app security for all clients, simplifying Microsoft 365 data protection and management.

Save time and reduce costs

Cut operational costs by managing training and phishing simulations for multiple clients with a multitenant management console. Significantly reduce admin

overhead by utilizing templates and perform bulk operations for hundreds of users.

TRAINING THAT EMPLOYEES WILL ENJOY

Engaging content

- Bite-sized, easy-to-digest videos.
- Continuously updated with emerging threats and security best practices.
- Simplifies recognition and handling of security incidents for employees.

Phishing exercises

- Phishing exercises with interactive quizzes.
- Educate employees on handling specific phishing attempts.

THE ACRONIS PLATFORM ADVANTAGE

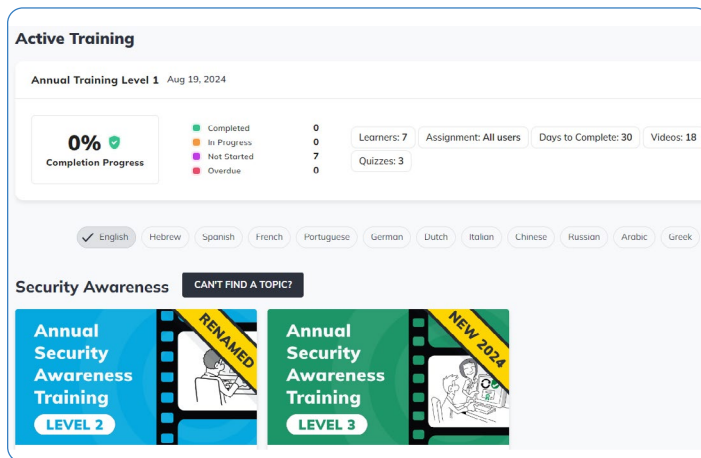

Enables vendor consolidation with native integration with other compelling services and solutions, including:

- Device backup
- 365 / GWS backup
- Endpoint Security and XDR
- Disaster Recovery
- Data Loss Prevention (DLP)
- File Sync and Share
- Cyber protection management
- Email Security
- Collaboration App Security
- Security Awareness Training
- Email Archiving

- Prepares users to respond appropriately to security incidents.
- Train employees to identify and resist social engineering tactics.

Courses offered

- Training on security awareness
- Phishing and ransomware
- Social engineering and password safety
- Multifactor authentication
- Device and data management
- Data privacy and compliance (e.g., GDPR)
- Social media and mobile safety
- Safe AI usage
- Domain-specific courses available (e.g., ethics, financial services, remote work)

Smart phishing simulation

- Create and deploy phishing campaigns that mimic real-life social engineering attacks directly to users' inboxes.

IMPROVE CUSTOMER SATISFACTION AND SECURITY HYGIENE AND STREAMLINE SERVICE DELIVERY

Flexible reporting

- Review completion metrics on the dashboard.
- Drill down to specific reports by department or user.
- Track training progress and phishing results.
- Monitor users' completion status.
- Identify topics needing more focus.
- Set reminders for completion.

Effortless adoption

- Transform security awareness training into an engaging experience.
- Utilize an intuitive learning management system.
- Ensure high user satisfaction and completion rates.

Streamline deployment and billing

- Easily deploy SAT and configure monthly billing via Acronis' multitenant platform.
- Streamline your operations with a single platform for admins and invoicing.
- Natively integrated with Acronis Advanced Automation or your current PSA platform.

Multilanguage support

- Available in 12 languages.
