

THE DATA BEHIND COMMUNICATIONS CONTROL

AI, cyber risk and vendor dependency are restructuring enterprise communications.

Cyber Incidents Are Rising

● % of large UK businesses experiencing a breach or attack

43%

of UK businesses experience a cyber breach or attack in 2025.

Source: UK.GOV

35.5%

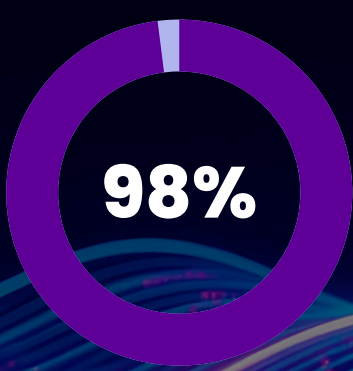

of breaches involve third-party access.

Source: SecurityScorecard

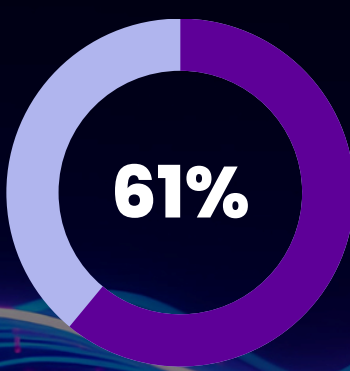

Modern communications rely on infrastructure businesses don't directly control

Vendor, routing and cloud dependencies have expanded the attack surface and the risk.

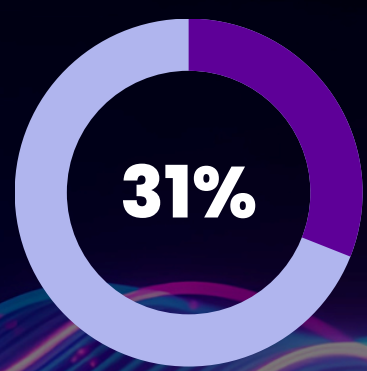

The Hidden Risks Behind Your Communications

of organisations work with a vendor that has experienced a breach.

of business lenders are concerned about where AI-processed data resides.

of organisations have formal AI governance policies in place.

THE SHIFT TO SOVEREIGN COMMUNICATIONS

Control your infrastructure. Protect your data. Build resilience for the future.
